

# Cynomolgus Fc gamma RIII/CD16 Protein

Cat. No. FGR-CM1R3

## Description

<b>Source</b>	Recombinant Cynomolgus Fc gamma RIII/CD16 Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Gly17-Gln208.
<b>Accession</b>	Q8SPW2-1
<b>Molecular Weight</b>	The protein has a predicted MW of 23.1 kDa. Due to glycosylation, the protein migrates to 45-55 kDa based on Tris-Bis PAGE result.
<b>Endotoxin</b>	Less than 1EU per µg by the LAL method.
<b>Purity</b>	> 95% as determined by Tris-Bis PAGE > 95% as determined by HPLC

## Formulation and Storage

<b>Formulation</b>	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
<b>Reconstitution</b>	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
<b>Storage</b>	-20 to -80°C for 12 months as supplied from date of receipt. -20 to -80°C for 3-6 months in unopened state after reconstitution. 2-8°C for 2-7 days after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

## Background

Immunoglobulin G (IgG) Fc receptors play a critical role in linking IgG antibody-mediated immune responses with cellular effector functions. A high resolution map of the binding site on human IgG1 for human Fc gamma RI, Fc gamma RIIA, Fc gamma RIIIB, Fc gamma RIIIA, and FcRn receptors has been determined. A common set of IgG1 residues is involved in binding to all Fc gamma R; Fc gamma RII and Fc gamma RIII also utilize residues outside this common set.

## Assay Data

### Tris-Bis PAGE

Cynomolgus Fc gamma RIII on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

### SEC-HPLC

# Cynomolgus Fc gamma RIII/CD16 Protein

Cat. No. FGR-CM1R3

## Assay Data

The purity of Cynomolgus Fc gamma RIII is greater than 95% as determined by SEC-HPLC.

## SPR Data

Rituximab captured on CM5 Chip via Protein A can bind Cynomolgus Fc gamma RIII, His Tag with an affinity constant of 0.251  $\mu\text{M}$  as determined in SPR assay (Biacore T200).
